

From a Qualification Project to the Foundation of a Logistics Network Thuringia

Strengthening the role of Logistics through Corporate Competence Development “

a pilot project by
Bildungswerk der Thüringer Wirtschaft e.V.
from 01 Jan 2006 until 30 Jun 2008

funded by:

Logistik Netzwerk Thüringen e.V.

Objective

The Objective of this project was to create contents and methods for the development of Logistics System Competence through Learning within the Work Process with employees in logistics companies and logistics departments

Approach

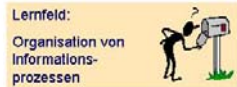

Results:

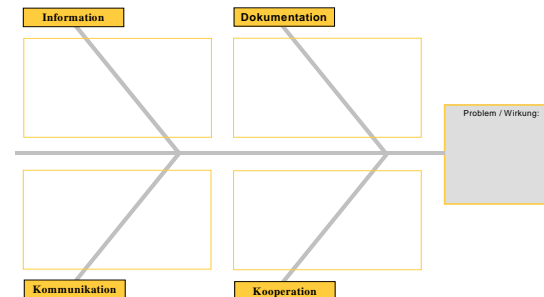

■ Set of Methods for the LearningProcessMentor

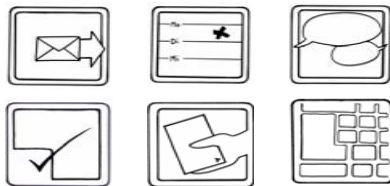

Referenzfragen-Katalog zur Bearbeitung von Lernanlässen im logistischen Arbeitsumfeld

Catalogue of questions for future reference to structure and deal with different fields of learning

Ishikawa method for a cause and effect analysis and problem solving within a learning group

Collection of pictographs for visualization of processes for information, documentation, communication and cooperation

Results:

- Further Education Offering for Companies (Brochure)
- Symposium „Change as a Standard – Process Optimization in Logistics“ 2007
- Winner of the ESF-Competition „Work and Qualification“ in 2006
- Managers from Logistics and Manufacturing companies as well as organizations that recognize the need for networking and drive the establishment of such a network

**The registered association
„Logistik Netzwerk Thüringen e.V.“
(Logistics Network Thuringia) was founded on
June 16th, 2008 by 9 founding members as a
nonprofit organization.**

Vision for 2018:

**If companies require innovative logistics solutions they should come to Thuringia.
Here, a network of logistics professionals is established that jointly develops new solutions and implements them.**

Fields of Activity of the Logistics Network Thuringia

- ✓ sustaining qualified employees through vocational training and further education
- ✓ establishing a modern understanding of logistics
- ✓ to further develop logistics as a key technology
- ✓ initiating research and development projects across companies
- ✓ setting up an infrastructure for information, communication and cooperation for network members
- ✓ promoting Thuringia as a location for logistics

Conditions for Funding of the Further Education Project for Network Creation

- joint discussion of competitors regarding a topic that concern all participants involved, specifically: employee competence development
- experiencing that fruitful cooperation benefiting all parties involved can prosper through communication
- discovering joint interests and involvement of additional participants
- supporting project management by further education professionals
